**Description**  
Flux-Off VZ Flux Remover is a highly effective cleaner for removing rosin-based fluxes from electronic components and assemblies. The non-ozone depleting Verizane™ solvent system utilizes Vertrel® Specialty Fluid from DuPont® to quickly removes flux without harming sensitive materials.

VERIZANE™ Cleaning Chemistry (VZ) - Chemtronics' most economical line of ozone safe cleaning solutions. Engineered to replace HCFC-141b, these low odor, no flash, nonflammable aerosols offer the most cleaning value for your money.

So ditch the dirt — without blowing your budget!

FEATURES & BENEFITS

- Nonflammable
- Cleans R, RMA, RA, and no-clean flux
- Low odor
- Dries fast
- Leaves no residue
- Test on plastics
- All-Way Spray valve - even sprays upside down

APPLICATIONS

- Removal of flux during post soldering applications
- Cleaning of printed circuit boards, component leads, and surface mount devices/pads
- Screens and stencils
