

Coventry Hi-Purity Alcohol Wipes – Polypropylene

Semicon grade IPA wipes for delicate surfaces

Rating: Not Rated Yet
[Ask a question about this product](#)

Description

Coventry™ Hi-Purity Alcohol Polypropylene Wipes are saturated with 70% semiconductor grade isopropyl alcohol (IPA) filtered through 0.05 µm media, and 30% water deionized to at least 18 MΩ and filtered through 0.2 microns filter. The superior purity make these wipes effective and safe in the most critical applications, without leaving residues that are conducive to microbial growth or dendritic growth in electronics.

FEATURES & BENEFITS

- Economical for general purpose use

- Excellent softness and ultra-low abrasiveness is ideal for delicate surfaces
- Low linting, melt-blown polypropylene material
- Ultra-low acidity, ionics, trace metallics, non-volatile residues (NVR) and particulates
- Increases safety by eliminating squirt bottles and spills
- Improves efficiency with consistent saturation
- Cleanroom double-bagged with resealable inner-bag to avoid solvent loss

Applications

- General cleanroom cleaning
- Cleaning critical metallic and non-metallic surfaces
- Aerospace production areas
- Medical device assembly
- Semiconductor Wafer Fabs
