Description

Foamtip™ Swabs are constructed from medical grade foam which features the best open cell structure, providing excellent particle entrapment characteristics. The foam is thermally bonded to the swab handle without using adhesives. These foam swabs are ideal for general cleaning applications.

FEATURES & BENEFITS

- Precision cleaning swabs with polyurethane foam head
- Purest medical grade foam

Chemicals: Chemtronics Foamtip Swabs

- Traps surface particles while cleaning
- High solvent capacity; holds solvent well
- Fiberless construction does not generate loose fibers or particles
- No adhesives or binders are used in the construction
- Economical for high quantity applications

APPLICATIONS

- Clean excess adhesives after gluing
- Clean micro-mechanical devices
- Remove Flux residues from printed circuit boards
- Apply small precise quantities of adhesive or lubricants
