Description

Ideal for particle-filled material and optical media applications, these tips also eliminate potential clogging for more accurate dispensing.

The unique SafetyLok™ hub thread ensures safe, secure attachment to the syringe barrel. Each hub is designed with flush mating of the hub to the cutoff for smooth fluid flow and to prevent trapped air. Each hub is also manufactured and quality-tested to be free of molding flash – bits of plastic that can block fluid flow and cause inconsistent deposits.

Dispensing: PTFE-Coated Tips

All Optimum dispensing tips are manufactured in the USA in silicone-free facilities to prevent fluid contamination and are certified for industrial use.

Tip hubs are color coded by size to help identify the gauge or internal diameter. Tips are also packaged in clear boxes for easy inventory control – with lot numbers, part numbers, and other information clearly labeled for greater process control and traceability.

Part Numbers

PTFE-coated Tips					
12.7 mm (0.507")	Gauge	Color	ID	OD	Qty/Box
7018243	21		0.51 mm	0.84 mm	20
