Description

Designed with unique, inert polypropylene tubing, these tips flex along edges and around corners for painting and solvent bonding and easy dispensing in hard-to-reach areas. Special flexible tubing prevents scratching or puncturing and can be easily angled or cut to length. Ideal for wiping over a surface where you need to spread a fluid, the cannula also resists clogging to provide the most repeatable, accurate fluid deposits.

Unique SafetyLok™ hub threads ensure safe, secure attachment to syringe barrels. Each hub is also manufactured and quality-tested to be free of molding flash – bits of plastic that can block fluid flow and cause inconsistent deposits.

All Optimum dispensing tips are manufactured in the USA in silicone-free facilities to prevent fluid contamination and are certified for industrial use.

Dispensing: Flexible Tips

Tip hubs are color coded by size to help identify the gauge or internal diameter. Tips are also packaged in clear boxes for easy inventory control – with lot numbers, part numbers, and other information clearly labeled for greater process control and traceability.

Part Numbers

		Flexible Tips				Gauge Color	ID	Qty/Box
12.7 mm (.50")	38.1 mm (1.5")							
7018085	7018080	15					1.36 mm 50 0.053"
