Description

These tips deliver precise, consistent deposits every time. Designed with our own unique polypropylene SafetyLok™ hubs that fit securely onto the barrel reservoir, general purpose tips prevent leakage and ensure drip-free dispensing. Each hub is designed with flush mating of the hub to the cutoff for smooth fluid flow and to prevent trapped air, which causes dripping and drooling. Burr-free passivated stainless steel tubing ensures consistent fluid deposits. Each hub is also manufactured and quality-tested to be free of molding flash – bits of plastic that can block fluid flow and cause inconsistent deposits. All Optimum dispensing tips are manufactured in the USA in silicone-free facilities to prevent fluid contamination and are certified for industrial use. Tip hubs are color coded by size to help identify the gauge or internal diameter. Tips are also packaged in clear boxes for easy inventory control – with lot numbers, part numbers, and other information clearly labeled for greater process control and traceability.
