Description

This valve provides many of the same benefits of the PICO Pulse jet valve, including high-speed dispensing at up to 1000Hz continuous*. It also delivers more accurate contact dispensing with less turbulence for greater fluid deposit consistency, placement, and process control.

Features

-
- Special tip adapter assemblies allow attachment of many different types of dispensing tips
- Ideal for critical line dispensing and repeatable deposits as small as 0.5 nL
- Apply extremely small dots and well-defined lines with precise control of the beginning and end points

Dispensing: PICO Pulse Contact Dispense Valves

- Exchangeable, modular design for greater configurability
- Tool-free latch for faster, simplified serviceability

Compatible Fluids

- Adhesives
- Alcohol
- Greases
- Oils
- Underfill
- UV-cure adhesives

The complete system includes a PICO Pulse contact dispense valve, PICO Touch™ controller, and fluid reservoir.
