Description

The preeflow eco-DUO450 is a rotating, perfectly pressure-tight, two component dispensing system with self-sealing rotor-stator arrangement. The controlled rotary motion of the rotor transfers the dosing material by displacement in the stator. The material is unchanged by this process. An added advantage is that the flow can be reversed: The 2 part dispensing system ensures a clean and controlled stoppage of material or medium. No drips, no mess.

Smallest dispensing quantity: 0.010ml
Adjustable dosing flow: 0.2 to 12 ml/min
Weight: 1.100g
