Description

The preeflow eco-PEN600 is a rotating, perfectly pressure-tight, dispensing valve with self-sealing rotor-stator arrangement. The controlled rotary motion of the rotor transfers the material by displacement in the stator. The dosing material is unchanged by this process. preeflow ensures a clean and controlled stoppage of material or medium. No drips, no mess! Due to an added advantage of the reversed flow.

Smallest dispensing quantity: 0.015 ml
Adjustable dispensing flow: 1.40 – 16.0 ml/min
Weight: 750 g
