Description

Like all other products in the eco-PEN series, the eco-PEN330 is also a rotating, perfectly pressure-tight, positive displacement dispenser with self-sealing rotor-stator arrangement. Conveyance action by material displacement in the stator through controlled rotor rotation. Safe conveyance without any modification of the dosing material. The programmable suck-back function avoids dripping and ensures a clean and controlled material thread-break.

Smallest dispensing quantity: 0.002 ml
Adjustable dispensing flow: 0.2 – 3.3 ml/min
Weight: 410 g
