Description

The valves' simple design features two ball valves threaded into the back of the manifold and connected to the common lever so both valves open and close at the same time.

Note: the 550 LV is not intended for "feathering" or otherwise attempting to meter the flow.

Manifold Options

- Low flow
- High flow
- Wide ratio

Dispensing: Series 550 LP and 560 HP Manual Dispense Valves

Optional Accessories

- Dispensing tips
- Manifold
- Night cap and ratio check cap
- One-piece jacket pipe adapter
- Retaining nut
