Description
Using Low Volume Low Pressure (LVLP) technology the 781Mini provides precision spay popular with consistent spay patterns as parrow as 1 mm (0.041 with consistent spay patterns as parrow as 1 mm (0.041 with consistent spay).

With a 60% smaller form factor than conventional spray valves it's possible to mount more valves per fixture plate for high volume applications. It's also possible to install in tighter manufacturing environments or complex space

ne 781Min's enhanced spray nozzle design improves spray pattern uniformity, providing better accuracy and edge definition. Its unique, patented (QR) quick release clasp reduces downtime to seconds when servicing the valve.

Features

- Mara mailares annos notices
- Consistent area coverage as narrow as 1 mm (0.04") wid
- COS amplies form forter than appropriated accountly and accountly account to the company of the company of
- High transfer efficiency with no oversoray
- Modular design for lawyr and of augustalia

Compatible Fluids

- Activators
- Coatings
- .....
- ...
- ...
- Liquid fluxes
- Solvents
- Ciliagna all

The complete system includes a 781Mini spray valve, ValveMate™ 8040 or 7140 controller, and fluid reservoir. Achieve greater productivity with a benchtop automated dispensing system.
