### Description

Fine-tune dispensing performance by setting ramp open and close parameters and stroke control from the unique Wave Profile screen.

Adjust pulse time in increments as small as .01 ms, set the valve operating temperature, and easily navigate to all required setup parameters. Cycle the PICO Pulse valve at up to 1000Hz continuous, with up to 1500Hz burst capability\*.

# Dispensing: PICO Touch Controllers

---

The PICO Touch controller provides the flexibility to dispense a wide range of fluids and viscosities. Better slope control delivers more repeatable deposits and prevents turbulence and air bubbles from entering the fluid, which prevents deposit variations.

\*With approved conditional settings.

## Features and Benefits

- Intuitive touchscreen interface for precise control of the PICO Pulse valve
- More control of valve operating parameters and dispensing performance
- Programmable lockout to prevent unintended changes to settings
- 480 x 272 resolution for sharper screen visibility
- More than 12 language display options

This controller also programs the PICO Pulse contact dispense valve.
