Description

The pQbE Cleaning Platform is designed for portability to clean all FTTx connector geometries, including SC/LC, MT-Type, OptiB®, and e2000. It is the ultimate in performance and convenience, and provides First Time Cleaning, all the time.

FEATURES & BENEFITS

- Conveniently fits into pockets and pouches for easy transport
- Developed for use with all connector types, SC, ST, FC, MT-type, APC and recessed connectors

Cleaners: Pocket QbE Fiber Optic Cleaning Platform

- Raised, ridged Fibersafe™ cleaning platen mounted atop the flat cleaning platen conforms to recessed connector end faces, and provides simultaneous cleaning to the ferrule and chamfer of non-recessed connectors
- Ridge causes wipe to deform slightly during use so previous cleaning path is obvious and not retraced
- Use with Electro-Wash® FX, Electro-Wash® MX, or Fiber-Wash cleaning solvents to perform the Combination Cleaning process (CCp™)
- Clear plastic packaging resists rain and provides view of remaining wipe quantity
- Patented – U.S. Patent Number 6,865,770 and foreign patents, additional U.S. and foreign patents pending

APPLICATIONS

- End-Face Connector cleaning for SC, ST, FC, MT-Type, APC and recessed connectors
- Splice Preparation
- Buffer Gel Removal
