Description

In the I&M Fiber Optic Cleaning Kits, Chemtronics has included only the cleaning supplies necessary for making a successful 2.5mm fiber optic connection. The I & M Fiber Optic Cleaning Kit contains one aerosol of Electro-Wash® PX Precision Fiber Optic Cleaner, and a QbE® Cleaning System for performing the Combination Cleaning procedure.

Use the swabs and wipes with the Electro-Wash® PX to clean the fusion splicer, especially the mirror and V-groove. Swabs are also included for cleaning ferrules, alignment sleeves and backplane connections. Electro-Wash® MX Premoistened Wipes are included for tool and cable wiping.

Chemicals: FOCCUS I & M Fiber Optic Cleaning Kit

The swabs are packaged in rugged tubes for field operations. The kit bags are made from tough nylon for long life. They are equipped with a carabiner to clip on a tool belt for transport or to clip a cable for convenient access.

I & M Fiber Optic Cleaning Kit Includes:

- 1 Electro-Wash® PX Universal Cleaner
- (ES810)
- 1 Q&E® Cleaning Platform, 200 sheets (Q&E)
- 50 2.5mm Foam Fiber Optic Swabs (48042F)
- 100 Lint-Free Precision Wipes, 4"x4" (6704F)
- 5 Electro-Wash® MX Premoistened Wipes (CP421)
- 1 Rugged Bag with carabiner attachment
- 1 Instructions
