Description

CCT™ Clear Connection Tool used with the FOCCUS™ MX Precision Cleaning Pen provides a fast, simple method of fiber optic cleaning. End faces in bulkheads or on cable assemblies are both effortlessly cleaned the first time . . . every time. CCT has an easy to use mechanism that advances fabric over a cleaning tip with just a short push and click of the tool. Using the CCT with the FOCCUS MX Precision Cleaning Pen provides for fast, easy and repeatable Combination Cleaning™.

CCT Cleaning Kits come with an MX Precision Cleaning Pen. Wet the CCT fabric tip with the MX pen, insert the CCT tip into the connector, and push in the tool 1 click to advance the fabric from wet-to-dry, perfectly cleaning the end-face. Combination Cleaning™ eliminates all debris and contamination the first time, avoiding expensive rework and truck-rolls from bad connections. Combination Cleaning™ is industry proven, exceeding IEC 61300-3-35, IEC TR6207-01, and meeting Telcordia GR-3263-CORE and SAE Aerospace AIR6031.

Chemicals: FOCCUS CCT Clear Connection Tool

FEATURES & BENEFITS

- Cleans connectors on back plane and on jumpers
- Uses Combination Cleaning™ process for first time cleaning, every time
- Effective for the widest range of contaminants
- Easy to use for quick and reliable cleaning
