Description

Two different needle sizes are available: 0.25mm for low viscosity no-clean and aqueous fluxes and 0.50mm for higher viscosity rosin-based fluxes. Each bottle is available in standard plastic or with optional ESD-safe cover.

- **0.01" (0.25mm) needle** - Ideal for low viscosity no-clean and water soluble fluxes.
- **0.02" (0.50mm) needle** - Ideal for higher viscosity rosin fluxes.
