Description

Thin profile handle and lightweight design are ideal for smaller hands. A Plato shear cutter has a thin profile designed for those hard to reach areas in electronic assembly. Assemblers love the effortless shearing action, comfort, lightweight and safety for electronics lead and wire cutting. A Plato lead cutter uses the shear cutting method, which requires 50% less operator effort and extends cutting life because they shear rather than pinch. Handles are cushioned for day-long comfort and automatically spring back to their original position after each use.

- FEATURES & BENEFITS**
- Cut up to 18 AWG copper wire (.047/1mm)
  - Economical, disposable cutter
  - Thin blade profile for trimming in tight areas

Ergonomic handle design  
Spring-back action
