Description

The PURJet System's patented technology allows for consistent and accurate dispensing of adhesive, even into small grooves and other complicated geometries. A variety of technologies combine to meet the stringent requirements for precise material dispensing in exacting processes of handheld/portable electronics manufacturing.

- Pneumatic modules deliver consistent dispensing and clean cutoff for beads
- Accommodates a wide variety of hot melt materials including polyurethane (PUR)
- Optimizes adhesive wetting of substrates for improved strength and impact resistance

Dispensing: Unity™ PURJet Series Dispensers

Unity HiTemp™ disposable syringe barrels are also available for use with Unity PURJet Systems dispensing hot melt adhesives at temperatures up to 180° C (356° F). Unity barrels provide more reliable, repeatable dispensing in addition to reduced downtime and cost of ownership.
