

WonderMASK PX Peelable Solder Mask

WonderMASK® PX is a temporary, peelable, latex solder mask designed to dry in half the time of standard peelable solder masks. It is hand applied and can withstand fluxing, wave soldering and cleaning operations. It effectively masks and protects open through-holes and underside components in a wave soldering process, and can be used as a conformal coatings mask.

Description

WonderMASK PX can remain on all areas of the board until ready for test, and then, be easily peeled away. In addition, WonderMASK PX is ideally suited for situations where a thick coat of mask is required. WonderMASK PX has been specially formulated to cure homogenously, virtually eliminating any limit on the deposition thickness.

WonderMASK PX is not recommended for use on bare copper as it contains a sufficient concentration of ammonia to cause discoloration. For use on bare copper, WonderMASK P (part # 2211) is recommended.

Specifications: Meets MIL-STD-2000 paragraph 5.3.18 parts a, b, and d.

FEATURES & BENEFITS

- Fastest full cure
- Ideal for situations where a thick coat of mask is required
- Easily peelable
- Highest strength to avoid breakage

Nonflammable
